### Julian Tintarea

Multipurposed software engineer

# Summary

**Projects** 

A versatile and self-motivated Software Engineer with a strong foundation in mathematics and informatics, demonstrated through consistent participation in competitive programming olympiads.

Education Liceul Teoretic "Henri Coandă"

Mathematics - Informatics

focus on performance and maintainability.

Highschool

- Alternated using OOP and DOD to guarantee code maintainability without sacrificing

- performance. - Implemented a **synced shop** across servers using the **os.time()** time function built into Roblox.
- Developed multiple user interfaces using Fusion (similar to Vue) and guaranteed crossplatform compatibility.
- Integrated multiple modular systems using Signals to minimize the risk of circular dependencies.

### https://juinc.github.io/portfolio

My portfolio

one week using Vue.js, TailwindCSS and Swiper.js.

My personal portfolio which (currently) showcases my main 4 big projects. I made it in roughly

This is the first project I created using Vue.js and TailwindCSS, and due to time constraints, I didn't manage to take a course on them, so I learned them while building the portfolio. During the development process I hit the following achievements:

- Implemented and optimized resource-heavy effects (Aurora & Particles from vue.bits and my

- Added multilanguage support using i18n, supporting English, Romanian and Spanish.

- background name effect) in an optimized manner by limiting the amount of mathematical operations ran at any given moment. - Implemented a fully responsive design with support for most screens.
- Vue.js, TailwindCSS, Javascript, HTML, CSS, Github, Git, Swiper.js, i18n

The Hooty bot https://github.com/juinc/Hooty-Bot

### The Hooty bot is an all-in-one Discord bot developed solo in Python with Discord.py, designed to streamline modern community management by combining multiple key features into one stylish

support because of my needs. It was developed in a little under two weeks. Achievements during development: - Developed a custom permissions system using raw Python to complement Discord's built in

and efficient package. It is designed to be deployed once per server, I didn't add multi server

- Created cogs for almost any feature found within big Discord bots.

Worked around Discord rate limiting and asynchronous development to tailor a smooth UX for

- users. - Packaged it in docker for easier deployment and running.
- **Omni Bank Database Manager**

Python, Discord.py, Backend, Discord API, OOP, Git, Github

## The Omni Bank Database Manager is an application written in C++ with an interface made using

https://github.com/juinc/Bank-DB-Project

school project but the school only asked for a Command Line UI Project which I found too easy so I added a full user interface with multi language support and auto refreshing. Development wise, I hit the following achievements: - Integrated multi language support by loading the text from a localization header file which stores

The Cherno's Walnut framework which runs on imgui with the Vulkan SDK. It was made for a

the English and Romanian text variants in an unordered map.

only writing when the app closes or the user saves manually. Integrated a No UI mode that can be toggled by passing -noui into the shortcut target parameters to fit the school's requirements.

- Integrated auto refreshing of the current loaded database by storing everything in memory and

C++, Vulkan, imgui, Walnut, Desktop

Studio Code, Visual Studio, Jetbrains IDE's, CodeBlocks, Git, Github, Flutter

**Informatics Olympiad** 

https://robo.nextlab.tech/

### I have participated in the programming olympiad for my county (9th, 10th and 11th grade) and scored in the top 10 overall for my class level in 10th grade.

2022 - 2023 - 2024

2022 - 2023

March 2025 - April 2025

**ITEC** 2023 https://itec.ro/

Nextlab 2023

I have participated in the ITEC programming competition during 9th grade, for the DSA section.

I have participated in the first stage of the neXtlab robotics competition and won a robotics kit through it.

I was a student for the Center of performance in informatics within my city for 2 years, where we did a deep dive in DSA.

InfoCNFB 2022 - 2023 - 2024

I participated in the InfoCNFB competitions, 3 years in a row, hosted by the most prestigious college in my city and got 4th place the first year.

Colegiul Național "Frații Buzești"

**English** 

Languages

Skills

**Awards** 

### Highly proficient in English; most comfortable communicating in it. . . . . .

CPPI

Romanian

Romanian is my native language.

**Spanish** I was born and lived 8 years in Spain, I have decent communication skills and can use it to communicate effectively.
